

CITY OF LAUDERHILL

ENGINEERING STANDARDS

CREATED BY THE DEPARTMENT OF ENVIRONMENTAL & ENGINEERING SERVICES

ENGINEERING STANDARDS MANUAL

INTRODUCTION

This manual of Engineering Standards and Specifications is the minimum accepted design requirements for engineering-related construction, public and private, performed within the municipal limits of the City of Lauderhill, Florida.

This Manual is a guide to the Engineer, Architect, Contractor, and other persons involved in construction within the City's jurisdiction.

All work within the municipal limits, including all City Property, rights-of-way and easements shall meet the minimum requirements herein described, including the latest revisions adopted by the City of Lauderhill Commission or the City's Department of Environmental and Engineering Services Division.

This Standards Manual incorporates the State of Florida Department Of Transportation, Broward County Engineering Department, South Florida Water Management District, Florida Department of Environmental Protection, and the Corps of U.S. Army Engineers Standards, as applicable.

ISSUED: January, 1999
REVISED: December, 2005
