Request Action:

Pass a resolution accepting the bid from FG Construction in the amount of \$562,275.00 for rehabilitation and improvement of existing five (5) bridges servicing within collector roadway system of the City of Lauderhill.

Need:

The primary reason for this project is to ensure public safety and extend our bridge service life.

Summary Explanation/ Background:

The city had hired a structural firm to conduct a 40-year inspection in our bridges and they recommended that we make repairs on our existing bridges. As bridges age, they become more vulnerable to structural deficiencies, corrosion, and wear and tear, which can compromise their integrity and pose risks to pedestrians and drivers using the bridges. Bridge rehabilitation usually include repair and restore all major structural deficiencies and damaged areas including substructures and superstructures specified in the structural plans as well as specified in the FDOT reports which required to be repaired or upgraded, extend and upgrade of existing sidewalk.
