# MOSQUITO AWARENESS

**How bad are mosquitoes in South Florida?** Mosquitoes are one of the most troublesome insects in Florida because they carry serious diseases. There are many different mosquito species found in Florida, both native and invasive. Diseases that are spread to people by mosquitoes include *Zika virus*, *West Nile virus*, *Chikungunya virus*, *dengue*, and *malaria*.

## **How do I get rid of mosquitoes in my backyard?**

1. Remove Standing Water. Female mosquitoes lay their eggs in standing water. ...
2. Keep the grass cut and plant growth under control. ...
3. Use Scents to Repel Mosquitoes. ...
4. Attract natural predators. ...
5. Start a Professional Mosquito Control Program.

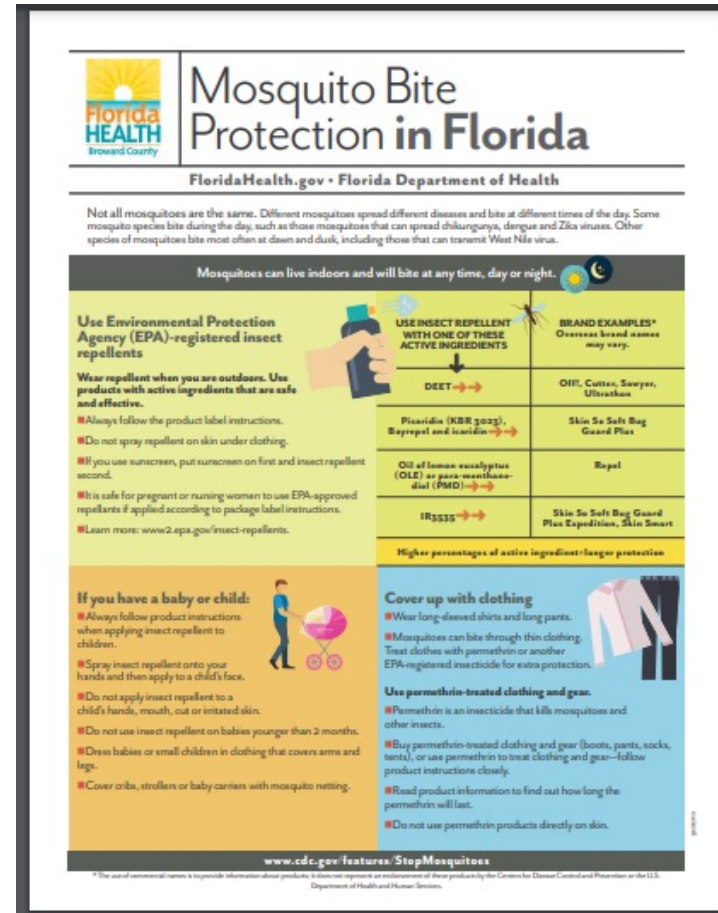

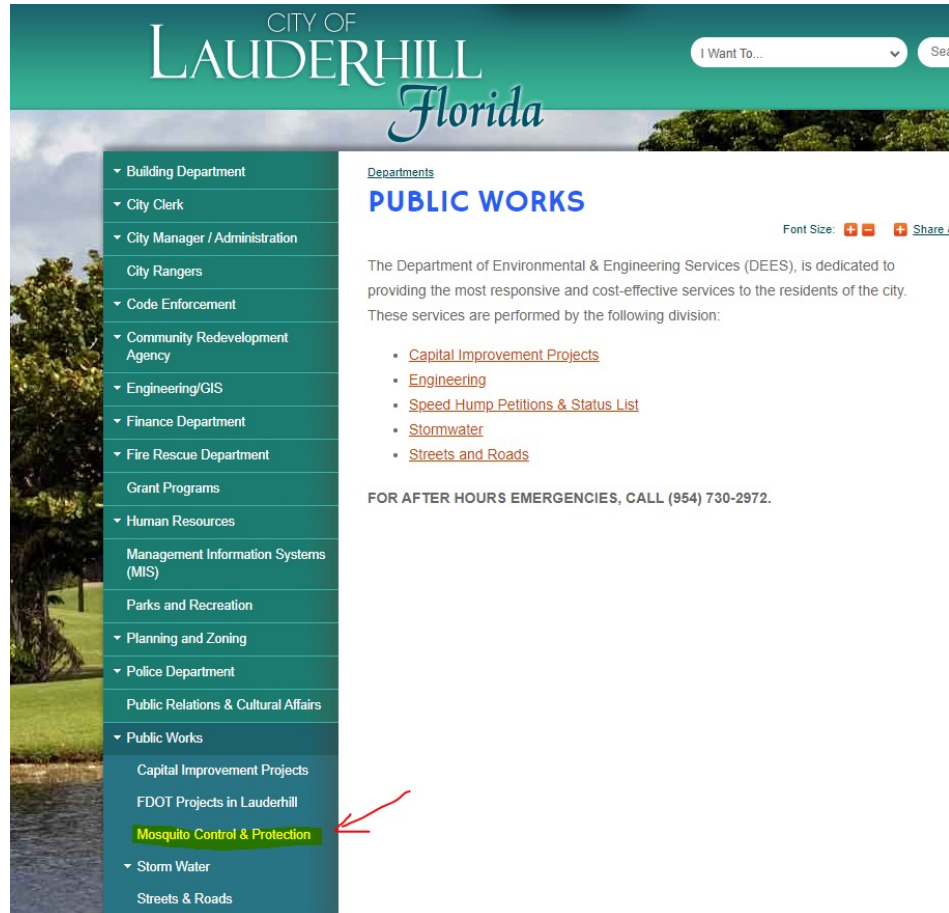

**Does Mosquito Control Treatment Work?** Yes. Mosquito control is very effective at diminishing the mosquito population around your property. In fact, four applications, from spring until fall, can reduce mosquitoes on your property by as much as 90 percent.

# MOSQUITO CONTROL

- **Is Broward County spraying for mosquitoes?** Yes. You can contact the Broward County Mosquito Control Section and request spraying in your neighborhood by Completing and submitting the online Mosquito Spray Request Form or by dialing 311 on a mobile device or 954-765-4062 from a landline. This Section treats areas of the County by backpack, truck, and plane based on surveillance efforts and service requests.
- **How can we get help?** There are two ways to search and learn “how to control mosquitoes”: City’s or County’s website.
