

LDR ART I Sec 1.5 Separation standard or requirement or distance requirement: The minimum distance between and among land uses as measured by the shortest airline measurements (or as the crow flies) between and among the nearest points on any plots to be occupied by such land uses. This definition shall apply to any separation standard identified within these Land Development Regulations unless the standard explicitly references that it is exempt from the definition in Section 1.5.

ART III Sec 5.3.3. *Measurement.* The separation standard methodology in Article I, Section 1.5., Definitions, General, shall not apply. Instead, for purposes herein, the distance shall be measured by the shortest route of ordinary pedestrian travel along the public thoroughfare or any walkway made available for public use from the main entrance of the establishment in question to the main entrance of the other establishment.
