Application Type: Site Plan & Warrant

A site plan application serves as the formal process through which a city reviews a proposed development to ensure it complies with all applicable land development, zoning, and design regulations before construction or land alteration begins.

A Warrant is a ruling that would permit a practice that is not consistent with a specific provision of this Schedule but is justified by the provisions of Section 1.3 Intent. The DRC shall have the authority to approve, approve with conditions, or deny administratively a request for a Warrant pursuant to regulations established by the DRC.

Any application for a development required or authorized under these regulations shall require approval by the Development Review Committee, the Planning and Zoning Board, and the City Commission prior to issuance of a development order or permit.

There are four conditions for approval for a site plan. All conditions must be addressed in order to grant approval, or conditions may be included on a development order to ensure compliance prior to the issuance of a building permit.

Development History

- The Lauderhill Mall opened in 1966, and the original building footprint was about 400,000 square feet.
- Over the years, a couple buildings were renovated & repurposed. In 2016, the building on the west side of the mall was renovated for a self-storage operator, and building at the south east corner of the property was renovated for Joys Roti restaurant.
- The property largely remained the same until 2021, when the Broward County Bus Transfer Station was constructed alongside a new outparcel building fronting on State Road 7.
- The following year (2022) a new financial intuition, Brightstar Credit Union, was constructed.

IV. PLANNING ANALYSIS

As stipulated in the Land Development Regulations, Article IV, Section 1.4., Major Review, The Planning and Zoning Division has reviewed the proposal against the following application requirements:

- A. The applicable provisions of the City Land Development Regulations and Code of Ordinances.
- B. The applicable provisions of the City Comprehensive Plan.
- C. The Florida Building Code, most current edition.
- D. Any applicable federal, state and county laws, rules and regulations.

Below is a brief summary of Staff's analysis of the relevant sections of the Land Development Regulations, zoning requirements, land use compatibility and applicable Code of Ordinances.

1. The applicable provisions of the City Land Development Regulations and Code of Ordinances.

- The proposal has been received approval, with conditions, by the Development Review Committee on September 23, 2025.
- A Transportation Analysis was submitted by the applicant & reviewed by the city's Traffic Engineers. The study finds that the existing driveways and access are sufficient to support the future development.
- The city has adopted standards for mixed-use developments (Article III, Sec. 3.8 – Mixed Use Development), and the plans have incorporated the applicable Standards.
- The applicant is requesting a warrant for a reduction on the fenestration on the ground floor. The proposal include commercial uses on the ground floor of one building, but the other two buildings propose the amenities and residential units on the first floor. As a result, staff finds that the minimum fenestration requirements would not be compatible with the residential uses.

2. The applicable provisions of the City Comprehensive Plan.

The proposal is located within the Transit Oriented Corridor, and therefore the redevelopment of underutilized parking area is aligned with the general vision for the area. Staff and the applicant are working together to ensure that the proposed development is successful for both future residents of the development and customers and businesses of the Lauderhill Mall. Staff finds that the Use is suitable in regard to location, characteristics and purpose.

3. The Florida Building Code, most current edition.

The Chief Building Official is a member of the Development Review Committee and has provided the applicant of the relevant Florida Building Code standard and edition that will be reviewed in full detail upon submittal of a building permit application.

4. Any applicable federal, state and county laws, rules and regulations.

The applicant must adhere to any federal state and county laws that would apply to their project. A plat note must be amended to permit the proposed mixed-use development on the property; however, the proposal is otherwise consistent with the County's land use designation.

V. COMMUNITY OUTREACH

As required by the Land Development Regulations (LDR) Article IV Section 1.9.6 *Neighborhood meetings*, the Applicant will conduct a Community Meeting, prior to placement on the City Commission agenda.

VI. RECOMMENDATION/ACTION

The Development Services Department has presented the proposal to the Development Review Committee (DRC), in accordance with the Land Development Regulations. The back-up and comments issued by the DRC are recorded and on file with the Development Services Department.

Should the Board find that the application has provided competent, substantial evidence to satisfy the review standards for a Major Site Plan approval, the Development Services Department recommends approval of the application subject to the following conditions, prior to building permit approval:

1. Provide a Unity of Title, Declaration of Restrictive Covenants, or similar document, that ensures the proposed dedicated permit parking for the residential buildings will remain adjacent to project as illustrated on the site plan.
2. Provide a copy of the recorded Plat Note Amendment, allowing 233 dwelling units on the subject property.
3. Provide a SCAD letter with a “final” approval for the site plan from Broward County.
4. A copy of the CPTED plan approved by the Police Office must be submitted.
5. Substantial compliance with all conditions of approval with the special exception, granted by the City Commission by Resolution (24R-10-259).
6. All public artwork must be reviewed and approved by a public art committee, established by the City, in order to ensure its universal appeal and applicability.
7. A public art fee will be assessed equal to one (1) percent of construction value of improvements to real property, with a maximum payment of two hundred fifty thousand dollars (\$250,000.00) in the aggregate for the entire development as provided for in the City’s Code of Ordinances (Section 6-35).
8. A Master Sign Plan must be submitted, prior to permit approval of the signs. The sign plan shall use the same colors and materials as the building, or may be part of the overall complex signage system developed in the tropical character. (Schedule P. Section 6.0)
9. Address any outstanding comments issued by the Development Review Committee, and substantial conformance to the City’s Code of Ordinances and Land Development Regulations.
