September 9th, 2024

To Whom It May Concern:

Please be advised that AMKUS Rescue Systems operates through a dealer network to provide our customers with the best and most efficient service. Each dealer is assigned a specific territory. That dealer is responsible for the customers in the given territory for all AMKUS sales and service.

The dealer is responsible for maintaining an inventory of spare parts to provide quick service to the customers in their territory. The dealer is responsible for installation, service, repair, maintenance and upgrading of the products in their territory using only genuine AMKUS parts.

Please be advised that **EMERGENCY VEHICLE REPAIR** (321) 228-7691 is presently our exclusive dealer for the sales and service of AMKUS Rescue Systems for Lauderhill, Florida. Please set them up as your authorized sales and service location. If I may be of further assistance, please do not hesitate to call, 1-800-592-6587.

Best Regards,

Logan Green

BAUER COMPRESSORS
Quality. Our DNA

September 18, 2024

To: Marie Aversa

Ref: Bauer Compressors, Inc. Sales and Service Authorization

Please accept this letter as confirmation that Compressed Air Supplies & Equipment is a factory authorized Bauer Compressors, Inc. sales and service distributor. We have had a long-standing relationship with Compressed Air Supplies and Equipment and find them to be a highly focused and customer driven organization. They have the capability of providing sales and service support on all breathing air products manufactured by Bauer Compressors Inc. Listed is their respective contact information:

Compressed Air Supplies & Equipment
4081 SW 47th Ave Suite 17,
Davie, FL 33314
Phone: (954) 929-4462

This appointment is valid until September 18, 2024, or until advised in writing, whichever comes first.

Please feel free to contact me if I can provide any additional information or answer any questions for you.

Sincerely,
Bauer Compressors, Inc.

Joseph Lyons
Director of Sales, Breathing Air Products

CONWAY SHIELD

14100 W Cleveland Ave. New Berlin, WI 53151 conwayshield.com

September 9, 2024

This letter serves as a sole source document for products manufactured by Conway Shield.

Conway Shield leather fronts are the only shields on the market that are constructed of three layers of chrome tanned leather. We also use DB 92 bonded polyester thread @ 8 stitches per inch.

Products manufactured by Conway Shield include the following:

- Shields, including standard leather, gold and silver leafs and metal shields
- Mini Key Chains
- Conway Shield Glove straps
- Conway Shield awards and plaques
- Chief's Choice by Conway Shield line of apparatus cleaning products
- Chief's Choice by Conway Shield Turnout Gear Wash
- Chief's Choice by Conway Shield Training Smoke
- Custom Decals

To the best of our knowledge, no other vendor manufactures these products to Conway Shield standard specifications. Please let me know should you need further details.

Sincerely,

Lee Kasten

September 9th 2024

To Whom It May Concern,

EPR Systems USA provides unique cloud-based NEMSIS and NFIRS compliant records management software solutions for Fire and EMS Agencies. All under a single database.

EPR's Fireworks software provides a turnkey, customizable, stand-alone solution specialized for Fire/EMS operations that provides unique features for public safety personnel in the field. The mobile solution works on any smart phone, tablet, or iPad (iOS or Android).

Proprietary to EPR is our direct Fire Marshall and EMS billing feature that brings data into Billing Solutions with no required effort from the customer, CommunityWorks a community-facing portal allowing businesses & residence to obtain & pay for permits, inspections etc, fully customizable Learning Management System that has built in educational content from Jones & Bartlett Learning or Axene Con-Ed as well as Dual Factor Authentication and SSO through Microsoft Azure.

EPR also provides all platform customization and report writing at no additional cost.

EPR's FireWorks Response Mode puts critical data at the responder's fingertips. Including built-in Waze & Google navigation, ESRI Mapping, Pre-Plan data, Hydrant data, DOT Camera integration & much more. All of this data is available to all mutual aid partners through EPR's unique data-sharing capabilities.

The FireWorks solution incorporates the latest state-of-the-art technology and best of breed features available on the market. Unique features to the FireWorks system include the ability to view a map from a birds-eye view of the incident or inspection right from your mobile device. The map view provides the ability to turn on the color-coded hydrant layer on the interactive map. This enables your first responders to see the location before they even arrive to the emergency. Color coded map views of properties according to Risk Assessment are also unique to EPR's solution.

EPR is proud Silver Partner with ESRI/ArcGIS allowing integration from agencies ArcGIS accounts as well as rest services.

FireWorks RMS also provides unique Business Intelligence tools that graphically display all incident data in interactive charts and graphs. The NFIRS Analytics and BI tool produces many of the reports required by the ISO for an audit as well as CFAI Accreditation reports. This unique tool provides a dynamic dashboard that enables you to click from a visual chart and drill down to the actual incident including any pictures that were taken on the scene.

Company Qualifications and Reputation:

EPR Systems is an international software company, in business for 22 years, providing innovative municipal solutions. Our customer service is unparalleled and is our #1 priority.

Our one-stop shop approach to NFIRS, NEMSIS and Education reporting as well as robust modules for inspections, preplans, hydrant, Learning Management and analytics makes FireWorks software an innovative solution for today's modern Fire Service. Our cloud-based software hosted in the secure Amazon Web Services Cloud allows for access and functionality across all smart devices and popular browsers.

Please contact us at (941)-328-3239 if you have any questions regarding our solutions, service, or support.

Very truly yours,

Jeff Jacobson

KEYLITE
POWER & LIGHTING CORP.
Start Strong - Finish Strong
Stay Strong

September 10, 2024

Re: Fire Station Alerting System Sole Source

To Whom it may concern,

On October 10, 2017, the Broward County Commission "County" and Keylite Power & Lighting Corp. "Keylite", entered into a System and Service Agreement "R1426611P1" Fire Station Alerting "FSA". The system and service agreement provides goods and services for the FSA system to support current and future fire department alerting needs for Broward County and local public safety personnel. The agreement allows for municipalities in Broward County to piggy-back for goods and services.

The initial term of the Agreement commenced on October 10, 2017, and ends five (5) years after the date of Final Acceptance. Final Acceptance was achieved on June 30, 2020. The parties agree the initial term ends on June 30,2025. The agreement also allows for two (5) additional five (5) renewal terms.

In addition, Keylite is the sole integrator and service provider for the Fire Station Alerting Network "FireNet". The FireNet Network provides wireless connectivity with redundancy of all regional participants' fire stations to the County E-9-1-1 Regional Dispatch Centers. The FSA includes the utilization and integration of the US Digital Design Phoenix G2 Fire Station Alerting System used to alert municipals stations via the County's Computer-Aided-Dispatch (CAD) system.

Currently, the City of Lauderhill is a participant of the Broward County E-9-1-1 Regional Dispatch and has utilized Keylite for the acquisition, installation, integration of the FSA system and support.

If you have any questions, please me @tbailey@teamkeylite.net or (504) 491-2384.

Truly,

Troy Bailey, Vice President
Public Safety & Fire Station Alerting Operations

LEXIPOL

January 1, 2024

To Whom It May Concern:

This letter sets forth justification for Lexipol, LLC as a sole source provider of risk management tools for public safety organizations. Lexipol offers subscription-based policy management and training services that are purchased by public safety and local government organizations directly from Lexipol.

DEPARTMENT NEED

Your agency or department requires a policy management solution that is compliant with applicable laws and regulations, implemented by qualified professionals, customized to fit your needs, and includes scenario-based daily training bulletins with tests to reinforce and demonstrate policy comprehension. The system must be readily accessible online and via mobile devices, provide real-time policy updates, and include a supplemental manual for department-specific procedural content.

LEXIPOL PRODUCT DETAILS

Lexipol's comprehensive policy management solution is the only one to provide all of the above. A Lexipol subscription provides access to substantive copyrighted content on a proprietary, web-based knowledge management system that enables issuance of department-specific policy, captures electronic signatures for compliance, and assigns training to reinforce comprehension and application. Lexipol's policy solution allows each agency or department to increase policy compliance and personnel safety while improving the services provided to the communities they serve.

By working with Lexipol, each agency and department takes advantage of our unrivaled network of subject matter experts and legal resources to implement policy management solutions. Due to the increasing complexity of evolving laws governing public safety organizations, hiring resources that carry the requisite legal expertise in this subject matter has proven cost prohibitive on a per-department basis.

JUSTIFICATION FOR SOLE SOURCE AWARD

As thousands of other agencies and departments have determined through comprehensive review and due diligence, no other platform provides a comprehensive policy management solution suite like Lexipol. Others may staff personnel who help write and review policy content but lack the necessary software platform to track ongoing personnel compliance and knowledge management. Alternatively, they may provide a platform to house content but do not offer training and updates to ensure retention of vital material. Finally, many lack tracking and reporting altogether.

Only Lexipol offers a comprehensive policy solution that meets all department requirements, making it the sole source for your needs.

If you have any questions or need assistance, please feel free to contact us. We appreciate the opportunity to serve and support you.

Sincerely,

Jan Roos
Vice President and General Counsel
compliance@lexipol.com

Re: ONSOLVE, LLC ("ONSOLVE") CodeRED® Service

Dear City of Lauderhill Fl.,

The CodeRED Emergency Notification System allows our clients to deliver high-speed, customized mass notifications. The CodeRED system utilizes many features that individually and in combination make ONSOLVE and CodeRED a unique sole provider. No other service provider may sell or license the CodeRED system, which is solely owned and operated by ONSOLVE. Below are several of the unique features of CodeRED, a service of ONSOLVE, which cannot be duplicated by any other system:

Data
ONSOLVE provides our clients with initial geo-coded calling data for immediate use as the foundation of your database, to ensure an expedient implementation process. Data is acquired through various commercial sources and includes residential and business data. We source our data from the best providers, geocode the data ourselves, complete all updates without requiring client involvement, perform extensive de-duplication processes, integrate all 9-1-1-data while scrubbing the records, geocode community opt-in entries on the fly, and clean all data. Simply put, CodeRED features more records and more highly accurate data, ensuring more successful connection rates.

Simultaneous Notifications / True Blast Dialing
In order to maximize the speed of each notification, all contacts are alerted simultaneously for each type of launch. We have found that creating an infrastructure robust enough to handle simultaneous launches ensures emergency messages reach their intended audience as quickly as possible.

RealCall® Messaging (*Unique process, Patented U.S. Patent 6324262 B1)*

ONSOLVE is the only emergency notification system provider authorized to utilize RealCall® patented technology. This proprietary functionality enables CodeRED to deliver accurate messages in their entirety to answering machines and other voicemail devices without looping or repeating the message. RealCall® has been proven to maximize the efficiency of the local telephone infrastructure when telephone circuits are in high demand. Other technologies leave partial, truncated or repeated messages—wasting valuable telephone circuit resources when they are most needed.

Universal ANI® Caller Identification *(Unique ability and technology)*
CodeRED utilizes a unique Universal ANI®, which is a toll-free call back number for residents to call in order to hear the last message delivered to their phone number. This technology optimizes telephone circuit demand and reduces the resources needed to successfully complete each notification.

Validata® Process *(Unique ability and technology)*
CodeRED leverages ONSOLVE's unique Validata® telephone number validation process to confirm every number in the customer's database. This proprietary methodology is used to verify the validity of entries and identify addresses lacking valid phone numbers.

CodeRED Weather Warning® (*Unique ability and technology*)
CodeRED offers the option to add CodeRED Weather Warning®, which delivers automated severe weather warnings to residents in the direct path of a storm within seconds of the alert being issued by the National Weather Service. Weather Warning is the only early warning system available to utilize the NOAA Storm Based Warning system's polygon data to pinpoint a storm and automatically call those who will be impacted first.

CodeRED® Mobile Alert App (*Unique ability and technology*)
The CodeRED Mobile Alert app is used to maximize the reach of any given notification. Utilizing advanced geo-aware technology, the app provides an additional location-based method for clients to deliver CodeRED-initiated notifications. The CodeRED Mobile Alert app, which is unique to ONSOLVE, allows clients to reach not only residents, but also visitors passing through the area. It also serves to protect citizens when they travel outside their primary coverage area.

Full IPAWS Capabilities *(Unique ability and technology)*
CodeRED includes a fully functional Message Alert Origination application for launching Integrated Public Alert and Warning System (IPAWS) messages in support of FEMA's program. Unique to CodeRED, this function is activated directly within the same system interface as all other notification methods to streamline the creation of messages disseminated to the public.

ONSOLVE Launcher App *(Unique ability and technology)*
CodeRED provides a stand-alone app which allows authorized system users to send notifications directly from their smartphone or tablet when away from their office. Within seconds users can

create and send notifications to contacts within specific geo-targeted areas without requiring the use of a computer, providing enhanced real-time situational awareness and updates. As you can see from the list of unique features above, City of Wilton Manors has multiple reasons to sole source ONSOLVE's CodeRED service. Many of our clients can immediately purchase the system through the sole-source method by leveraging the totality of these and other benefits. Please feel free to contact me if you have any questions.

Sincerely,

Kelly Hiller
Account Manager

September 10, 2024

To Whom it may Concern:

The purpose of this letter is to provide justification of a sole source licensing by the Lauderhill Fire Department for a planning and communications platform called ReadyOp, a service offering owned and offered exclusively by ReadyOp Communications, Inc. This licensing is justified on a sole source basis as no other program offers the complete package of services as listed below.

The licensing on a sole source basis with ReadyOp Communications is justified due to the following features and capabilities can be included in a single, secure website for the State's use:

1. The ReadyOp application is currently the only application on the market that we are aware of that combines the following capabilities into a single application:

    a. ReadyOp is a web-based program that can be used to template and prepare for planned events as well as incidents, emergencies and daily operations for single and multiple agencies.

    b. ReadyOp provides six ways to communicate (phone, radio, text, email, alerts, secure video and secure voice) with personnel in multiple organizations within a single desktop display.

    c. ReadyOp enables users to securely store, share and view photographs, maps, rosters and other files with other approved users quickly and from any location with Internet access.

    d. ReadyOp enables users to design and use forms for reporting, checklists, status updates, equipment and training requests, asset management and many more activities.

2. ReadyOp includes a roster for storing personnel names, contact information, organization and special tags for fast recall and communication. This will provide personnel to quickly locate and communicate with individuals with special training and capabilities.

3. ReadyOp includes the ability for storing information on assets which may be needed in an incident response or emergency, including the name of the person, organization and contact information.

4. There is no requirement to purchase any hardware to support the use of ReadyOp except a minor investment for each radio talk group to be included for communication.

The ReadyOp service is unique in that no other program offers the combination of resource access, security, information and communications. Approving this sole source purchase will enhance the planning and response capabilities of the City of Lauderhill and the Lauderhill Fire Department.

Please contact our company at 813 289-7620 for additional information if needed. Our website is www.ReadyOp.com.

Marc Moore

March 21, 2024

Dear Customer:

Ten-8 Fire & Safety is constantly reviewing the way that we provide services and support the emergency service industry in this ever-changing economic environment. We continue to expand our service footprint throughout our territory and increase our service offerings and capabilities. Additional facilities, staffing, training, tooling, and improvements to our legacy locations are just some of our investment areas. We continue to remain committed to these investments and maintain our position as the industry's leading partner in Florida and Georgia.

This continued investment in our service network combined with the record levels of inflationary impact necessitates an adjustment in our labor rates. The following rate changes will be effective from June 1, 2024.

Shop Labor rate - $165/ Hour.
Mobile Labor rate - $185/ Hour, travel, and onsite time.

****Rate increases do not apply to any existing fixed price contracts.***
****Any service started prior to June 1, 2024, will be billed at the prevailing rate when the work was started.***

Thank you again for your continued patronage. We will continue to provide you with the best quality service available in the industry.

Please feel free to contact me at any time with any questions you may have relative to the service we provide.

AstroTurf Corporation

THE WORLD LEADER IN SPORTS & RECREATION SURFACES

AstroTurf. FIELDS | Rekortan TRACKS | Laykold COURTS | SYNLAWN LANDSCAPE

10/1/24

Esteemed AstroTurf® Field Owner,

Thank you for being a part of the AstroTurf® family!

AstroTurf® is not just your partner through the build phase of your project. AstroTurf® is available to address all your field needs as it relates to maintenance and warranty of your field and to answer any other questions you may have.

AstroTurf® strives to manufacture the highest quality synthetic turf products in the world. To keep your field performing at the highest levels possible, routine field care and regular maintenance must be followed and performed. It is highly recommended that any repairs, field care and regular maintenance services performed on a field be logged with the date, occasion and type of maintenance service or repair that was completed.

Your AstroTurf® warranty is directly related to the maintenance and warranty repairs performed on your field. To avoid any warranty questions and or issues **all maintenance and warranty repairs must be performed by AstroTurf® certified crews only, and any additions to the existing turf system must be AstroTurf® products installed by AstroTurf® certified crews.** Any use of unapproved maintenance companies or unapproved turf products can and will put the warranty of your field at risk.

AstroTurf® employs fulltime, seasoned maintenance service professionals and certifies certain other companies who are ready to assist you with any comprehensive field maintenance and any problems or concerns that you may have.

If you have any questions, please contact Leroy Lawson with the AstroTurf® Corporation at llawson@astroturf.com or call me at (704) 902-2928. Also, please refer to your AstroTurf® Field Operation and Maintenance Manual for Astroturf® field care information and assistance. The manual contains valuable field care information and is a great resource that can be used as a field care quick reference guide.

Thank you!

Florida Stormwater Association

February 21, 2024

City of Lauderhill
5581 West Oakland Park Blvd
Lauderhill, FL 33313
Attn: Purchasing Dept

To Whom It May Concern:

This letter serves to notify you that Florida Stormwater Association, Inc., a not-for-profit Florida corporation (EIN# 59-3245975), is the sole provider of FSA Stormwater Operator Certification Courses.

Florida Stormwater Association's Stormwater Operator Level 1 program is intended to improve the knowledge and competency of stormwater management field personnel by providing high quality, consistent training that assures a recognized level of knowledge and skill.

Florida Stormwater Association's Stormwater Operator Level 2 program is intended to familiarize stormwater management field supervisors with the tools necessary to effectively implement their organization's goals and objectives. It includes leadership skills and communication; basic engineering and functions of stormwater management systems; stormwater permitting and water quality improvement programs; the Community Rating System; budgeting; and stormwater utility fees.

Sincerely,

Danielle Hopkins

Re: Sole Source Letter

Dear Joan:

Thank you for your interest in Cityworks (the "Offering").

This letter confirms that the Offering is a product, designed, created, and owned exclusively by Azteca Systems, LLC, a Trimble Company ("Trimble"). Within the United States of America, Trimble is the sole source provider of the Offering and related maintenance and support services.

Please feel free to contact the undersigned at George_Mastakas@trimble.com if you have any questions.

Sincerely,

Signed by:
